EDUCATION

Princeton University

- Ph.D. in Computer Science, advised by Prof. Tri Dao 08/2024 - 05/2029

Cornell University

- Master of Engineering in Computer Science, GPA: 3.993 06/2022 - 12/2023
- B.S. in Computer Science with Honors, Magna Cum Laude, GPA: 3.890 09/2018 - 05/2022

PUBLICATION & MANUSCRIPT

RESEARCH EXPERIENCE

Research Assistant

Prof. Tri Dao’s Lab, Princeton University 08/2024 - 12/2025

- Efficient MoE implementation on Hopper GPUs **[ICLR’26]**
 - Developed an efficient MoE implementation that achieves 1.86x training throughput and reduces the activation memory footprint by 45% compared to a prior SOTA MoE baseline on H100 GPU. Proposed a novel token rounding that eliminates compute wasted on padding by Grouped GEMM kernels and improves 16% training throughput for sparse MoEs while preserving inference quality.

Research Assistant

Prof. Beidi Chen's Lab, Carnegie Mellon University

06/2023 - 05/2024

- Memory-efficient LLM fine-tuning [ICLR'25]
 - Combined sparse fine-tuning techniques with zeroth-order (ZO) optimization methods to personalize LLM fine-tuning while respecting memory constraints on devices (8 GB).

Research Assistant

Prof. Christopher De Sa's Lab, Cornell University

06/2021 - 05/2023

- Centralized example ordering for improved optimizer convergence [NeurIPS'22]
 - Collaborated to develop the Gradient Balancing (GraB) algorithm that leverages per-example gradients from the prior epoch to determine the example order in the next epoch, with a provably faster convergence rate than the random reshuffling (RR) method.
- Distributed example ordering for improved optimizer convergence [NeurIPS'23]
 - Designed the Coordinated Distributed GraB (CD-GraB) algorithm that generalizes the GraB algorithm to the distributed setting without centralized access to all data examples.
- High-precision floating-point computation for learning in hyperbolic space [HAET@ICML'22]
 - Developed the [MCTensor](#) library that implements high-precision Multiple-Component Format (MCF) algorithms with PyTorch-compatible interfaces, and the [HTorch](#) library that integrates hyperbolic space optimization pipelines with MCF algorithms.

Research Assistant

Prof. Thorsten Joachims's Lab, Cornell University

06/2022 - 02/2023

- Ranking with slot constraints [KDD'24]
 - Proposed the MatchRank algorithm that recommends a shortlist of relevant candidates while respecting the set of slot constraints defined by decision-makers.

TEACHING EXPERIENCE

- **Graduate Teaching Assistant, Princeton**
 - COS 568 Systems and Machine Learning 01/2026 - 05/2026
 - COS 324 Introduction to Machine Learning 08/2025 - 01/2026
- **Graduate Teaching Assistant, Cornell**
 - CS 4787 Principles of Large-Scale Machine Learning Systems 08/2023 - 12/2023
 - CS 4780 Intro to Machine Learning 01/2023 - 05/2023

ACADEMIC SERVICE

- **Reviewer:** NeurIPS ('23, '24, '25), ICLR ('24, '25, '26), ICML ('24), KDD ('24), Journal of DMLR, ACL RR (06/24, 10/24), ICML ES-FoMo workshop ('24, '25), COLM ('25, '26)

HONORS

- Princeton University Graduate Fellowship
- Cornell Engineering Honor Society membership
